OBJECTIVE

UX/UI Developer with over 10 years experience creating web applications. I enjoy working collaboratively with a team to design, prototype, test and deliver products. Currently looking to join a fun team working on interesting projects where I can be a valuable contributor.

EMPLOYMENT

HomeAway   Austin, TX

UX Developer at HomeAway   *2015 – 2016*

- Helped establish the new Design Technologist role within the UX Design team.
- Collaborated with designers and product managers to create testable prototypes.
- Participated in user testing to create new iterations based the results.
- Joined team responsible for developing the final product to help with creating the experience.

HomeAway   Austin, TX

UI Developer at HomeAway   *2011 – 2015*

- Lead UI developer on property management team for 3 years.
- Created property management dashboard with tools enabling the management of many properties at once.
- Created a javascript plugin to provide a i18n enabled feedback tab across all global brands
- Built early products primarily with backbone, handlebars, and an in-house 'thin-ui' java based system which allows decoupling of the UI and backend applications.
- Adopted React later to replace the UI stack.

BancVue Interactive   Austin, TX

Senior Front-end Developer   *2009 – 2011*

- Created credit union web sites using html, css, Javascript and a content management system.
- Introduced the use of SASS and methods to ensure cross browser consistency.
- Improved the efficiency, quality and speed of sites created.
- Selected to work on special projects involving Javascript/css3 solutions to replace flash.

Sundry Studio   Austin, TX
Designer & Front-end Developer   *2005 – 2009*

- Worked with clients and advertising agencies to design and develop search engine optimized websites that can easily be maintained through a content management system.
